

SPECIFICATIONS

GENERAL:
The FoodSafe Foul Air Trap is used to prevent gases entering the catch basin and facility from the sewer pipe. Used where Run or P-Traps cannot be used, and compatible with all FoodSafe Catch Basins.

MATERIALS:
- T304/T316 Stainless Steel
- NBR Seal

INSTALLATION:
The FoodSafe Foul Air Trap shall be installed in all FoodSafe catch basins. Foul Air Traps are a drop in system for ease of installation and maintenance.
